

8-9-2011

Dear Sir,

I wish to make the Environment and Sustainability Committee aware of my grave concerns about the TAN 8 proposals

I have lived in Mid Wales for over 40 years but came from the Midlands and know ~~that~~ families there that the thought of the extra traffic congestion due to the windfarm projects will be making them choose other areas for their holidays if this goes ahead.

It will also affect me and all the other local residents in these areas as we go about our daily lives. The roads in this area are just not suitable for such large vehicles and time spent improving them will cause further traffic upset and delays.

We have no local hospitals that can deal with medical emergencies and long delays to hospitals 40 miles away are an important consideration for me as even travelling with a non life threatening complaint on our roads is traumatic

I can only see huge problems if this goes ahead and sincerely hope that this committee will find other solutions to prevent the scarring of our beautiful countryside and destroying tourism on which so many livelihoods rely.

Yours Sincerely

MRS. J HANRATTY
