RE TAN 8 Power Plans

Dear Sirs

We are a family, with three young children, living in Penrhos, Powys.

**And we don't want the Pylons and we don't want the Wind Farms.**

We don't want our kids to get cancer.

We don't want our houses devalued.

We don't want our valleys defaced.

We don't want our tourism to be wrecked.

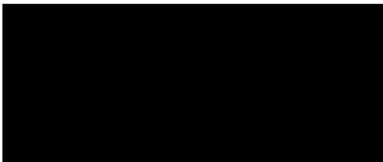

We don't want our road networks clogging up.

We do not understand why plans are still even being considered for further wind farms to be built when there is very clear evidence that they are ineffectual and not an alternative 'Green energy source at all.

It all seems incredibly unjust that the beautiful valleys and lives of the mid Wales people should be ruined, just so a few greedy landowners and energy companies can mop up the subsidies being handed out for supposed 'Green' energy!

Please re - consider.

Kind regards

Chloe Read
