Dear Sir/Madam,

I am writing to support a call for a review of TAN3 and its subsequent consequences on the Welsh countryside. Unless this document is looked at properly the results will be devastating to the environment, the Welsh economy, the infrastructure and the future of Wales. This cannot be allowed to happen for the sake of a few TARGETS and a renewable energy that even children can see, will not solve a global problem but create a whole lot more irreversible ones.

It is a massive sacrifice for the amount of energy that may be produced and is totally unreliable. In the normal run of things if something doesn't work it is disregarded!

Yours faithfully

Mr. M. Holden
